

Flying V Mahogany TV

For the first time...a TV Flying V!

A 1959 Flying V and TV Model mash-up! Gibson's famous "TV Model" Les Pauls of the 1950s featured limed mahogany finishes and were popular around the same time as the development of the radical new Flying V. However, the Flying Vs were made of Korina wood, so Gibson never played with the finish options...that is until now. Presenting the limited-edition Flying V Mahogany TV series, featuring '59-spec construction and appointments and bodies made from solid Mahogany, which is sonically very similar to Korina. The finish options include classics like TV White and TV Yellow and exciting new TV colors -- TV Black Gold and TV Black Silver. Get your hands on one of these Gibson Custom masterpieces while they last!

Specs

Series	Custom Limited
Neck
